Recron®
Fibrefill
Anti-Microbial

Protect with
Comfort

The 'Protect with Comfort' Recron® Fibrefill Anti-microbial range, as the name suggests, is the ideal fibrefill for bedding products used in hospitals, childcare and other hygiene related applications for your well-being.

Bacteria Buster. Fungus fighter

Recron® Fibrefill Anti-microbial comes with a special ingredient that inhibits the growth of bacteria and fungus. It also controls dust-mites, which are known to cause respiratory diseases like asthma.

Proven Anti-microbial Activity

Recron® Fibrefill Anti-microbial has been tested for anti-bacterial and anti-fungal properties by ASTM E 2149-01, using commonly prevailing bacteria and fungus in the environment. It is found to exhibit excellent anti-microbial activity against all these microbes. The activity is found to be good even after 20 washes.

Controls Odour. Guards Against Staining

The absence of bacteria and fungi means pillows, duvets, quilts, etc. will stay odour free. The anti-microbial treatment also keeps them looking new by protecting against staining.

Retains Freshness

The combined result of anti-microbial treatment, odour control and stain control means pillows, comforters, quilts, etc. stay fresh for longer.

Extra Softness. Maximum loft. Superior Comfort

The engineered hollow cross-section with up to 20% hollowness traps air between the fibres, making it fluffier and softer. That results in increased loft and enhanced comfort.

Product Range:

Micro, 1.5, 6, 7 & 15 Denier Siliconised (Both Regular & Conjugate type) Pillows, cushions, quilts, comforters, duvets, etc.
