Recron[®]
Fibrefill
Conjugate

**Hi-Loft and
Bouncy**

'Hi-Loft and Bouncy' Hollow Conjugate Recron® Fibrefill has been specifically designed to meet your requirements of 'springy and lively' comfort.

Superior Loft and Comfort

Recron® Fibrefill Conjugate is the result of in-house research and development by Reliance. The special technology used to produce Recron® Fibrefill Conjugate ensures that the spiral crimps in the fibre are far more stable than contemporary filling fibres. Hence, products filled with Recron® Fibrefill Conjugate give better loft and resilience.

Less is More

Recron® Fibrefill Conjugate can help achieve the same level of resilience and loft as with regular fibrefill even with 10-15% lesser filling.

Extra Fuffiness

The engineered hollow cross-section with up to 22% hollowness traps air between the fibres, making it fluffier, softer and lightweight. Provides firm support – an excellent choice for 'Back Sleepers'.

Non-Allergic

Recron® Fibrefill Conjugate prevents the build-up of allergens making it completely safe for use.

Product Range

4, 7 & 15 Denier with Siliconised, Non-Siliconised and Slick finish.

End Uses:

Pillows, cushions, quilts, garment insulation, upholstered furniture, soft toys, etc.
