

Recron® Green Eco-Friendly Hollow
Fibrefill for Sleep & Comfort Products

Recron®
GREEN

Concern for our environment is an increasing global phenomenon as 'Global Warming' is posing a serious threat to life. This has resulted in increasing demand for green environment-friendly products.

Filling fibres are no exception. **Environment-conscious buyers are known to insist on green fibres in fill products. Therefore, the need for an eco-friendly fibrefill like Recron® Green.**

Eco-friendly Hollow Recron® Green Fibrefill range offers sensible and sustainable comfort products. Using eco-friendly fibrefill instead of traditional stuffing helps in maintaining the 'eco-balance' of the Earth based on the principles of 'Recycle, Reduce & Reuse'. Result: lower

greenhouse emissions as compared to virgin polyester.

Being a regenerated product, **Recron® Green does not compromise on any of the qualities that a polyester fibrefill must possess.** The look, touch and feel of the comfort products made from Recron® Green Fibrefill are as good as those made from virgin polyester fibre.

Regenerated Hollow Recron® Green Conjugate gives you loftier, bouncier and lightweight products with excellent recovery and is easy to maintain with the characteristics of permanent 3-dimensional crimps and higher hollowness.

Everyday Functional' Recron® Green Fibrefill is meant for regular daily use 'value for money' products and also contributes to the cause of the environment.

Using Recron® Green Fibrefill, you can 'sustain' your business and the environment too.

**Global
Recycle
Standard**

Recron® Green certified with Global Recycle Standard (GRS) - from the internationally recognised Global Green product certifying agency

- The quality assurance measures and eco-friendly processes adopted by Reliance
- Recron® Green meets with some of the strictest and most demanding environmental criteria for being a Green Fibre

Recron® Green for global markets

Oekotex Standard 100 (Product Class 1)

This standard is presently established for baby articles and is the most stringent one. Recron® Green meets with the human-ecological requirements of this standard.

California Technical Bulletin (CATB) 117, Section C & D (Part 1)

Recron® Green meets the flammability requirements of this standard.

British Standard (BS) 5852, Part 2

Recron® Green can offer specific grades that comply with flammability requirements of this standard.
